DECO FREESTANDING TRELLIS

REVIEW ALL STEPS BEFORE STARTING ASSEMBLY

DT

HARDWARE LIST

	Quantity
A  2" Screw	(8)

PRELIMINARIES

This trellis is intended to be used in conjunction with a potted plant of your choice (not included). Keep in mind that the weight of the plant serves to anchor the trellis in place. If you choose not to use a potted plant of sufficient weight, the trellis will need to be anchored to the ground or secured in some other manner.

PARTS LIST

- 1 Trellis
- 2 Base Boards
- 3 Support Blocks

ASSEMBLED PRODUCT

TOOLS REQUIRED

- Power Screwdriver or Drill

Win FREE Arboria Products

Be sure to enter your email and telephone so that we may contact you if you win. **Upload a photograph for an extra chance to win.** Visit www.Arboria.com for official rules. No purchase necessary.

ASSEMBLY INSTRUCTIONS

DECO FREESTANDING TRELLIS

STEP 1 Position one base board on top of support blocks with underside of base nested between blocks. The edge of the base board should extend 1/2" beyond end of blocks.

STEP 3 Place potted plant (not included) on base.

STEP 2 Position base as shown, using trellis to determine spacing between base boards.

When spacing is satisfactory, fasten second base board to support blocks.

ENVIRONMENT

Congratulations, this Arboria garden structure is crafted from natural and chemical-free wood. Wood, as a building component, is recognized by the USDA¹ as yielding fewer greenhouse gases than other common materials. The use of wood provides substantial environmental benefits when compared to oil-based plastics. Using natural, untreated wood in your garden is not only the beautiful choice, but it reduces the exposure of plants, people and animals to potentially harmful chemicals. You can trust the Arboria name for environmentally conscious, exceptional outdoor products.

¹USDA.com Release No. 0426.11

ABOUT YOUR PRODUCT

This Arboria garden structure is made from natural and untreated Western Red Cedar, a species that is known for its natural resistance to pests and decay. This product features furniture-style craftsmanship to ensure strength and durability over the years to come.

Like all wood products subjected to weather, small hair-line cracks may develop. These should in no way impair the strength and usefulness of the furniture.

CARE AND MAINTENANCE

If left unstained, your Arboria garden structure will silver within a year or two of exposure to the elements. Silvering is a natural occurrence and is often considered a desirable look. The overall integrity of your garden structure is not compromised during this process. The inherent rot and pest resistance of the wood will provide a degree of protection and help your garden structure to endure over the years.

If you wish to further protect your structure from the long-term effects of aging or to stabilize the color/finish of your product, we recommend applying a quality water or oil-based finish. Best results can be achieved by using Penofin (www.penofin.com, 1.800.PENOFIN) as per manufacturer's instructions. If you desire to paint your product, we recommend a quality oil or acrylic primer coat prior to applying the final coat(s). Be sure to allow sufficient time for your product to dry. Avoid applying finish to any metal or non-wood parts, as well as any sections of your product which have a factory applied color stain.
