| <b>A</b> |  | 1 1/4" Screw (4) |
| <b>B</b> |  | 3" Screw (4)     |

### ASSEMBLED PRODUCT

### PARTS LIST

- 1 Support posts      2 Shelf unit

### TOOLS REQUIRED

- Power screwdriver or drill

Handy to have:

- Tape measure
- Bit holder may be needed if using a drill with a quick-change chuck

# ASSEMBLY INSTRUCTIONS

## POTTING SHELVES

### STEP 1

- Attach shelf unit to support posts with 1¼" screws through the pre-drilled holes. Align the vertical ends of the shelf flush to the edge of the support.

**NOTE:** Assemble the shelf to post supports with the spacing blocks on the same side as the shelf.

### STEP 2

- Align the top of the spacing block (on the support post) to the top of the leg, centering the shelf assembly to the back of the bench.
- Attach the assembly to the bench with 3" screws through the pre-drilled holes.

### ENVIRONMENT

Congratulations, this garden structure is crafted from natural and chemical-free Western Cedar. Wood, as a building component, is recognized by the USDA<sup>1</sup> as yielding fewer greenhouse gases than other common materials. The use of wood provides substantial environmental benefits when compared to oil-based plastics. Using natural, untreated wood in your garden is not only the beautiful choice, but it reduces the exposure of plants, people and animals to potentially harmful chemicals. You can trust the Arboria name for environmentally conscious, exceptional outdoor products.

<sup>1</sup>USDA.com Release No. 0426.11

### ABOUT YOUR PRODUCT

This garden structure is made from natural and untreated Western Cedar, a species that is known for its natural resistance to pests and decay. This product features furniture-style craftsmanship to ensure strength and durability over the years to come. Like all wood products subjected to weather, small hairline cracks may develop. These should in no way impair the strength and usefulness of the furniture.

### CARE AND MAINTENANCE

If left unstained, your garden structure will silver within a year or two of exposure to the elements. Silvering is a natural occurrence and is often considered a desirable look. The overall integrity of your garden structure is not compromised during this process. The inherent rot and pest resistance of the wood will provide a degree of protection and help your garden structure to endure over the years.

If you wish to further protect your structure from the long-term effects of aging or to stabilize the color/finish of your product, we recommend applying a quality water or oil-based finish. Best results can be achieved by using Penofin ([www.penofin.com](http://www.penofin.com), 1.800.PENOFIN) as per manufacturer's instructions. If you desire to paint your product, we recommend a quality oil or acrylic primer coat prior to applying the final coat(s). Be sure to allow sufficient time for your product to dry.
